Product images in this catalog are not to scale.

The following pages represent the wide variety of interior trim products available through the Big C Lumber Window and Door Facility. Throughout this catalog, there are products noted that are available for immediate delivery (stock item) with the balance of items available with a short lead time.

Our Window & Door Facility stocks the most popular moulding profiles as shown in this catalog. Additionally, our Custom Millwork & Cabinet Facility has over 1,200 (and growing!) custom moulding knives to create just about any moulding profile you need. We also have the ability to make cutting knives to help you match a hard-to-find existing profile, or create a special moulding unlike any other.

We can provide many other specialty products too. As our Service Promise #9 states: "If we don't carry the products our customers want, we will do our best to find them." Special orders are our specialty!

**In addition to the interior products featured in this catalog,  
our Window & Door Facility offers these products:**

**Doors**

- Jeld-Wen (Interior & Bifold)
- Therma-Tru (Exterior)
- Custom Pre-Hung Solid & Hollow-Core Interior Doors
- Custom-sized door height, width, and jamb sizes available (including Dutch doors and Butler doors)

**Hardware**

- Hinges
- Hinge Door Stops
- Spring Door Stops
- Rigid Door Stops
- Handrail Brackets
- Ball Catches
- Shelving Brackets
- Shelf & Pole Brackets
- Kwikset & Schlage Locksets
- Bath Hardware

*Hinges and door hardware are available in several finishes as shown below.*

# Window & Door Facility Products and Services

## Stair Parts

- LJ Smith

## 1 x Boards

- Radiata Clear
- Red Oak Clear
- Poplar Clear
- Poplar Primed
- Windsor One
- MDF Primed

## Plywood

- Poplar
- Oak
- Birch

## Miscellaneous

- Johnson 3' x 6'8" Pocket Door Hardware
- Johnson 3' x 6'8" Jamb Frame Kit
- Johnson Bypass Track
- Johnson Bifold Track
- Unfinished Particle Board Shelving
- White Pre-Finished Particle Board Shelving
- Poplar and Oak Mantles
- Attic Stairs (Standard and Fire Rated)
- Attic Access Frames
- Closet Rods
- Senco Pneumatic Fasteners

**Our Custom Millwork & Cabinet Facility stocks many varieties of hardwoods and softwoods. Other species are available through special order.**

## Hardwood

- Poplar
- Walnut
- Butternut
- White Oak
- Rift White Oak
- Quarter-Sawn White Oak
- Red Oak
- Rift Red Oak
- Quarter-Sawn Red Oak
- Birch
- Ash
- Sapele
- Cherry
- Hickory
- White Hard Maple

## Softwood

- Clear Cedar
- Clear Pine
- #2 Pine
- Ponderosa Pine

# **Window & Door Facility Products and Services**

## **Interior Doors and Trim**

- Interior door and trim estimating services
- 11 stock door sizes: solid core, hollow core, and wood
- Custom width and height door sizes available
- Custom jamb sizes available
- Prehung French and Dutch Doors
- Interior door trim casing and stops applied
- Prefinishing capabilities with 10 stock colors for all wood products
- Custom prefinished colors available with no up charge to match
- Paint prefinished available for most products
- Interior trim hardware available (door stops, handrail brackets, etc.)

## **Exterior Windows and Doors**

- Exterior door and window estimating services
- 14 exterior door and window brand names available
- Custom mulling capabilities
- Capability to manufacture and apply custom size jambs (windows and doors)
- Prefinishing available for window interiors
- Dedicated service personnel certified by Andersen® and Marvin®
- Dedicated installation services for windows and exterior doors

## **Commercial Door Products**

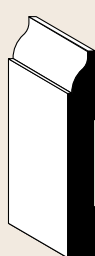

- Hollow metal, wood, and hardware estimating services
- Stock program for metal doors, frames, commercial hardware, and accessories
- Commercial wood doors available
- 5 Stock prefinished colors available in oak and birch
- Custom prefinished colors available with no up charge to match

Whether you are building new or remodeling - the right moulding can transform any room from average to extraordinary. We have prefinishing capabilities with 10 stock colors to match your décor, and we offer custom prefinished colors with no up-charge to match. You can also order your mouldings primed, which allows you to paint as you desire. A note about color variation; since wood is a product of nature and is subject to a wide variety of anomalies, the finished product from one piece to the next can vary based on the wood species selected, specified grade, veneer match, and cut. If your project requires uniformity, ask us about samples and pricing of “select” material.

## BASEBOARD

Baseboards are placed along the wall at the floor. Choose a style to work in harmony with your casings. (Baseboards are usually thinner than the casing.)

# BASEBOARD

# BASE CAP

Add a little extra flair to your typical baseboard. A Base cap is typically added on top of a S4S (surfaced four sides) board, giving it more dimension and style. Base caps can also be used as a panel moulding for various finishing applications. A simple touch - big results.

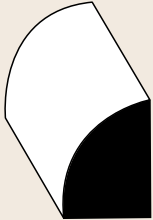

• DENOTES STOCK ITEM

♦ DENOTES SPECIAL ORDER LEAD TIME

Note: "MILL" See page 5 for species

# BASE SHOE

Base shoes are placed on the floor against the bottom of a baseboard. This moulding helps to conceal variations between the baseboard and flooring. When a base shoe is coupled with a base cap and a baseboard, they combine to create a touch of elegance to a room. The versatility of using a base shoe works well to serve other trimming needs too.

--------	------	----	---

# CASING

Casings are used to trim the gap between drywall and the door or window frames. Since casings are seen more at eye level, they help to define the character of a room. (Casings are usually thicker than baseboards.)

# CHAIR RAIL

Chair rails are generally applied to a wall anywhere from 24 to 48 inches above the floor. Helping to protect the wall from scrapes and scuffs, they are both practical and decorative. Chair rails are a perfect accent to a room. They can also be used to divide different wall materials such as wainscoting on the bottom and drywall on the top.

Another small detail that can make a big impact, crowns are placed along the wall at the ceiling. Available in several sizes and patterns, they help to blend the transition from wall to ceiling. While adding another dimension, crowns also give your rooms a distinctive flair!

# SCREEN MOULD & STOCK

Screen mould and stock are commonly used to hold mesh screening into wood screens such as an enclosed patio or screen door. This versatile moulding has many other uses, such as an edge trim on wood shelving or wood trim for wall finishing.
